

Democracy allows for many different freedoms but they are in direct contradiction of the Spirit of the Lord.

Private ownership of property is allowed under Democracy but is not Spiritual in nature. Gods "chosen" people are allowed to be landlords of the Earth which belongs to God alone. Private property or its concept allows for those with more money to become wealthy-wise by obtaining more and more land. In America, it is possible for one family to own as many properties as it can afford through Capitalism, yet thousands of physically and mentally ill people as well as thousands who are unskilled and cannot afford to own property are left completely out of the market. These are the poor and oppressed who shall be first in the kingdom of God.

With the Democratization of the Soviet State and Republics there will be a great diminishing of the Spirit by making private property available under the administration of Democracy to hundreds of thousands of Soviets and East Europeans. Although this may appear to be a great breakthrough, its appearance is only formed by the Capitalistic powers through the mass-media. Mass media has much to gain through the advance of Democracy as it too is a part of the materialist system. Without advertisements, TV, newspapers and radio would either bankrupt or be given over to the hands of the people. Neither of these choices is acceptable to the money and power brokers who control the media system. Essentially the media system is one of the main methods of promoting the "falling away" from Spirit unto materialism.

FACTS TO REMEMBER!

I. THERE IS ONLY ONE ATOMIC STRUCTURE 666 AND IT IS CARBON.

A. CARBON HAS 6 NUTRONS/6 ELECTRONS/6 PROTONS

II U.S. Petroleum use... (Petroleum is HydroCARBON!)

A. 1960 19 Quadrillion BTU (British Thermal Units)

1. BTU is the universal method of energy conversion)

B. 1989 34 Quadrillion BTU

=====

The above is how much HydroCARBON products are used by the United States alone each of the given years. Things to remember concerning the use of HydroCARBON are.... Most energy conversion is via the car or as it used to be called, the internal combustion engine. This method of transportation is used mainly for work (i.e. the earning of money to promote materialism); For pleasure (i.e. vacations which are a bi-product of the Calvin work ethic, (i.e. only those who work deserve vacations)); For traveling to ever increasing places to shop thereby expanding and idolizing Materialism and Capitalism; Propelling offshoots of internal combustion (i.e. jet fighters, the war machine of tanks and all branches of internal combustion used by the war machine).

Beyond the use of expanding the Evil Spirit, the bi-product of these internal combustion devices DESTROY the very Earth on which we secondarily depend for life itself. This comes from a destruction of the Ionosphere and ozone pollution of the breathable atmosphere. This causes considerable increase in respiratory illness and cancer among the temples of our bodies. CO is CARBON Monoxide, the result of burning HydroCARBON.

In 1989 we used 34 quadrillion BTU of HydroCARBON while we only produced 19 Quadrillion BTU. This leaves 15 quadrillion BTU of HydroCARBON that had to be purchased from other sources, mainly those of the Mideast such as Kuwait, Saudi Arabia etal. Our continued dependency on other sources detracts from the Spirit. The Mideast is 99% Islamic.

The only alternative to buying HydroCARBON from other countries is to open up large areas of wildlife refuge and protected areas to be exploited by Materialist, Capitalistic companies to exploration and RAPE of the land. this is done in the name of the American lifestyle and at the expense of the Earth of which we are given as a gift by our Lord to be conservators.

The only presumption available from the above CARBON burning is assume to be a moving away from the Spirit and a movement towards Materialism.

REMINDER

Materialism is riding the two horses. We cannot serve God and Earthly goods at the same time. We must have only one God and it cannot be money (i.e. materialism and its sources and byproducts)
